Installation Comparison

Traditional Installation

Materials

Two Stub Outs	\$ _____
Two Supply Stop Valves	\$ _____
Escutcheons	\$ _____
Bracketing Solution	\$ _____

Note: Time estimates assume all tools & materials are readily available.

Lav Box Installation

Installation time savings

Materials

Sioux Chief Lav Box \$ _____

Features & Benefits

Simple

One product, one frame. Easy sourcing, planning, costing and bidding.

Fast

Eliminates multiple touches. Eliminates the system drain-down, recharging and leak detection steps.

Savings

Material savings and labor savings transition variable costs into a known and reduced fixed cost.

Consistent

Standardized finish and valve layout every time. Every installation will look the same.

Strong

The box acts as the bracket. Added support bar protects the box during the drywall installation.

Quality

High quality valves and materials including highly durable ABS. Brass alloy is no lead, dezincification-resistant and stress-corrosion cracking-resistant.

Aesthetically Pleasing

High quality finish with beveled and contoured frame that can be painted or wall papered.

Liability vs. Warranty

Reduced chance for leak. Typical joints that are made during the finish phase are replaced by a warranted product.

OxBox System

All OxBox products have one frame size.

Maintenance

Valve seats can be replaced if fouled by debris.

Made in USA

The OxBox is made in the USA from top quality materials, including no lead valves.

Rough-In Install

Boxes eliminate valve installation at finish, reducing the chance for leak.

Installation Options

Installs on or between studs

Installs with supply from above or below

“The consistent and repeatable installations and look of the OxBox Lav Box was enticing. Its comparative time and material cost savings over traditional installations just makes sense.”

Step Two

Connection
All industry-leading connection options available

Options & Product Variations

Arrester Product or Standard

- All boxes available in arrester options

No Lead Inlet Connections

- All common connection styles available
- No lead valves are additionally dezincification-resistant and stress-corrosion cracking-resistant

Rough-In Pack or Standard Pack

- All product is either offered with frame as standard pack or without frame as rough-in pack
- Rough-in packs ship separate from frames, keeping frames clean and secure until the job's end

696-G2001WF

696-G2001WR

Fire-Rated or Regular

- Fire-rated OxBox products are certified by Intertek/Warnock Hersey to the following:

ASTM E-814

2 hours (F), 1½ hours (T)
for 2-hour design
1 hour (F), 31 min (T)
for 1-hour design

UL 1479

ASTM E-119

2 hours (F), 1½ hours (T)
for 2-hour design
1 hour (F), 31 min (T)
for 1-hour design

CAN/ULC S115

Accessories

Frame & Frame Inserts

- The single frame is the same size for all OxBox access boxes
- Notched frame insert conceals the valves and inhibits tampering of valves, leaving hose access
- Frame and frame inserts can be painted or wall-papered to match room decor

Frame Extensions

- Add 1/2" of additional depth per extension
- Frame extensions can be stacked
- Perfect for attaching frame past the gap between the wall and cabinet back

Caps

- Protect valves from undesired operation
- Brass caps with gasket for testing and valve operation protection

Debris Cover

- Provided to protect OxBox from drywall dust and debris

Box Clip

- Use to strengthen an installation or connect multiple boxes
- Tab folds into metal stud cavity for added rigidity

Sliding Support Bracket

- Used to affix box between studs
- Provides protection from drywall installers
- Adjustable length from 9" to 18"

Application Variations & Layout Options

Kitchen Sink

- Couple Lav box with a single 3/8" compression or 3/4" hose water service box for all supply needs

Side x Side Lav

- Perfect for residential or commercial applications
- Compact box size allows for multiple boxes & drainage in one stud bay
