

Model shown contains optional Seal Fail circuitry.

COMPONENTS

- a. ON/OFF Switch Control/Alarm Power
- b. 120V Incoming Power Terminals
- c. Power LED (Green)
- d. Pump HOA Switches
- e. Float LEDs (Red) x4
- f. Pump LEDs
- Pump Run (Green) Pump Fail - (Red)

- g. Simulate Float Buttons x4
- h. Float Terminals x8
- i. Lead/Lag Selecter Switch
- j. Dual Seal Fail Pot (Optional)
- k. Dual Seal Fail LEDs (Red) (Optional)
- I. Auxiliary Alarm Terminals

PROGRAMMING INSTRUCTIONS					
WITH POWER ON, HOAS OFF, FLOATS OFF OR DISCONNECTED, PRESS DESIRED FLOAT BUTTON RAPIDLY 4 TIMES AND HOLD					
PUMP LEDs WILL FLASH UPON SUCCESSFUL PROGRAMMING					
OPTIONS	FLOAT BUTTON	DEFAULT	OPERATION		
PUMP FAIL ALARM	STOP	ON	ACTIVATES IF A PUMP CAUSES "LAG" 3 CYCLES IN A ROW		
MANUAL ALARM RESET	LEAD	OFF	LATCHES HIGH ALARM: CLEAR WITH EXTERNAL TEST SWITCH		
SEAL FAIL HORN	LAG	OFF	ACTIVATES HORN UPON SEAL FAIL		
ALARM FLASHER	ALARM	OFF	FLASHES BEACON UPON HIGH ALARM		

ALARM CONDITIONS					
ALARM	BEACON	CONTROLLER LED	HORN		
PUMP FAIL	FLASHING	RED PUMP LIGHT	NO		
SEAL FAIL	FLASHING	SF1, SF2	PROG		
FLOAT FAIL	FLASHING	BAD FLOAT NOT LIT	NO		
HIGH ALARM	SOLID	ALARM FLOAT	YES

Single Phase Duplex

AE21L=3, AE21H=3, AE21L=4, AE21H=4 AE24L=3, AE24H=3, AE24L=4, and AE24H=4

Manufactured by SJE Rhombus®

Installation and Operation Manual

This control panel must be installed and serviced by a licensed electrician in accordance with the National Electric Code NFPA-70. state and local electrical codes. UL Type 4X enclosures are for indoor or outdoor use.

Warranty void if panel is modified.

Liberty Pumps offers a three-year limited warranty. For complete terms and conditions, please visit www.libertypumps.com.

Products returned must be cleaned, sanitized, or decontaminated as necessary prior to shipment to ensure that employees will not be exposed to health hazards in handling said material. All applicable laws and regulations shall apply.

Installing the Float Switches

The Single Phase Duplex control panel operates with float switches to activate pump STOP, LEAD pump START, LAG pump START and high-level ALARM functions.

A WARNING!

Ensure all power is turned OFF before installing floats in tank. Failure to do so could result in serious or fatal shock.

2 Label each float and cord end

STOP, LEAD, LAG, and ALARM

with the provided pairs of

3 A CAUTION!

If the floats are not properly mounted and connected in the correct order, the pumps will not function properly.

Floats require free range of motion. They must not touch each other or any equipment in the pump chamber.

Pipe Clamp Mounting

Mounting the Control Panel

NOTE

If the distance to the control panel exceeds the length of the float switch cords or the pump power cord, splicing in a liquid-tight junction box will be required. For outdoor or wet installation, we recommend a Liberty Pumps UL Type 4X junction box.

Wiring the Control Panel

Determine conduit entrance locations on control panel as s Check local codes and schematic inside the panel for the n of power circuits required.

A CAUTION!

Be sure the pump power voltage and phase are the same a pump motor being installed.

2 Connect the following wires to the proper terminal positions

- incoming power •
- pump 1
- pump 2
- float switches

See schematic inside control panel for details.

Typical Layout (May vary with options ordered).

A CAUTION! You must use conduit sealant to prever moisture or gases from entering the pa

Type 4X conduit must be used to maintain a Type 4X rating the control panel.

3 Verify correct operation of control panel after installation is complete.

Operation

shown. iumber as the s:	Liberty Pumps Single Phase Duplex control panel operates with float switches. When all floats are in the open or OFF position, the panel is inactive. As the liquid level rises and closes the STOP float, the panel remains inactive until the LEAD float closes. At this point the LEAD pump will turn ON (if the Hand-Off-Auto switch is in the AUTO mode and the power is ON). The pump will remain ON until both the STOP and LEAD floats return to their OFF positions. If the liquid level rises beyond both the STOP and LEAD floats to reach the LAG float, the lag pump will turn ON (if the Hand- Off the LAG float, the lag pump will turn ON (if the Hand-
	Off-Auto switch is in the AUTO mode and the power is ON). Both pumps will remain ON until the STOP, LEAD, and LAG floats return to their OFF positions. If the liquid level rises to reach the ALARM float, the alarm will be activated.
	 Alarm System (Indicator Light and Horn) When an alarm condition occurs, the red light and horn will be activated.
	 If the TEST/NORMAL/SILENCE switch is moved to the SILENCE position and released, the horn will be silenced. When the alarm condition is cleared, the alarm system is reset.
	- Hand-Off-Auto (HOA) Switches The HOA 3-way switches control pump functions.
1	$\prod_{\substack{\text{off}\\\text{Auto}}} \text{In HAND mode, the pump will turn ON.}$
)	OFF turns the pump OFF.
	In AUTO mode, commands from the float switches
	- Auxiliary Contact Form C - Can be wired normally open or normally closed.
	 Circuit Breakers (optional) Circuit Breakers provide pump disconnect and branch circuit protection.
	 Motor Contactors Motor contactors control pumps by switching electrical lines.
