Engineer _____	Contractor _____
PO # _____	Tag _____
Representative _____	

SPECIFICATIONS

Oatey's Mystic Rainwater Collection System is designed to direct rainwater from downspouts into collection barrels (not included) for the re-use in lawn/garden watering.

DESCRIPTION

- Fits standard 2" x 3" residential downspouts
- Two-piece design is made of UV-Resistant material
- Can be painted to match downspout color
- Includes a 4-foot high-flow hose & red outlet port plug

APPLICATION / USES

The Mystic Rainwater Collection System is designed to divert a maximum amount of rainwater through the hose and into a collection container of your choice. The Mystic's unique built-in reservoir channels rainwater flow from the sides of the downspout, while allowing debris such as leaves and dirt to go down the center. The result is more collected rainwater without the unwanted sediment.
